Category: Quality Control

Gieni OS Quality Control & Disqualification Standards

Gieni operates under a strict Zero-Garbage output policy. Files that fail any of the following 5 gates are automatically flagged as Disqualified / Rejected.

Gate 1: Real Estate Holdings in Pierce County

Approximately 35–40% of probate petitions involve personal property only (bank accounts, vehicles, brokerage assets). If no Pierce County real estate is owned, file is immediately rejected.

Gate 2: Non-Probate Transfer Bypass

If title transferred via Transfer on Death Deed (TODD) or Living Trust, title passed outside probate court. Probate PR has no authority to convey.

Gate 3: Equity Spread (LTV < 85%)

If senior mortgage, reverse mortgage, or IRS tax liens equal or exceed estimated market value, there is no wholesale equity spread. Disqualify.

Gate 4: Mobile Home on Leased Land Check

Verify parcel is fee simple real estate, not personal property mobile home situated on leased park space.

Gate 5: Actionable Authority

Decision maker must be identifiable with clear standing to petition or execute contract.
